

2015 Navigation Systems Road Show Workshop

SPONSORED BY
USCG AUX - Division 7

Classroom Session:
Saturday, April 25, 2015
0930 to 1230 hours

At the
Robinson Trowbridge Center
10 Health Lane, Warwick RI 02886, Suite 101
Next to Kent Hospital @ 455 Tollgate Rd Warwick, RI 02886

If you get lost the day of the class call 401-487-3668 for Mike's cell phone

@ John Forasté

The Navigation Systems Road Show is a review of the critical aspects of what is expected of each AV this year. The focus is on field work focused on on-scene observations and 7054 reporting. A new Patrol Worksheet will be used this year for collecting the required AV observations in the field. Most of the required documentation checks are already completed for the AV and are shown on this worksheet in order to help simplify their verifying job. All of the essential procedures that are required by an AV in the field will be explained and demonstrated during this training session. This training will take the AV from the required pre-underway checks of their GPS and Echo Sounder through the preparation of their Accuracy Statement, the use of a marine-grade GPS for taking the fix for a lateral aid, the use of a GPS for estimating the position for a regulatory buoy, taking and calculating the depth at datum, observing the aid, reporting discrepancies to the CG ANT, and preparing a highly accurate 7054 PATON Report. Updates to the Harbormaster System will be demonstrated including the new 7054 Report rejection procedure. The new 7054 Report Screening function will also be explained. All active AVs and AVCs (Aid Verifier Candidates) need to attend this important training.

***** PRE-REGISTRATION IS REQUESTED BY 4/24/2015 *****
